DETAILED ACTION

Election/Restrictions

Applicants' election of Group II (Claims 13-15, 17-21, 23-25, 27 and 28) in Paper No. 7 is acknowledged. Because applicants' did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 5, 11, 12, 16, 22 and 26 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

A statement reading, "This Application is a 371 of PCT/JP01/01386, filed 2/23/2001.", should be entered following the title of the invention or as the first sentence of the specification.

Information Disclosure Statement

The information disclosure statement filed 10/25/01 complies with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. It has been placed in the application file, and the information referred to therein has been considered as to the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1621

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13, 14 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Sie et al. {US Pat. 4,888,361}.

Sie et al. disclose a process for producing methanol, comprising reacting carbon monoxide with an alcohol in the presence of an alkaline earth metal-type catalyst to produce a formic ester, which is hydrogenated in the presence of a hydrogenolysis catalyst and hydrogen to obtain methanol (see Col. 4, lines 59-68 through Col. 5, lines 1-25). Sie et al. also teach a catalyst for producing methanol which may be obtained by loading an alkaline earth metal-type catalyst on a solid hydrogenolysis catalyst for formic ester (see Col. 2, lines 10-68 through Col. 3, lines 1-59).

Claim Objections

Claims 17-21 and 23-25 are objected to because of the following informalities: Claims 17-21 and 23-25 depend from claims, which have been previously cancelled by applicants' preliminary amendment, filed 10/25/01. Appropriate correction is required.

Allowable Subject Matter

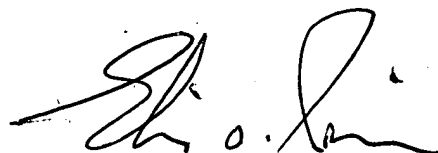

The following is a statement of reasons for the indication of allowable subject matter: Claims 15 and 28 are unobvious over the prior art of record because the prior art of record does not teach or suggest the presently claimed catalyst system, which is composed of an alkali or alkaline earth metal-type catalyst and containing Copper simultaneously with Manganese or Rhenium.
